

## BioCide 100

Kills 99.9% of Bacteria, Fungi & Viruses

### HOW TO USE

Direct Wipedown

Bucket & Sponge

Pressurized Sprayer

BioCide 100 is a broad-spectrum antimicrobial EPA rated grade sanitizer effective against 99.9% of bacteria, fungi/mold, and viruses. After applying BioCide 100 onto a surface, the binding agents in the BioCide 100 formula attach to the surface creating a long-lasting barrier, which is reactivated by moisture or humidity. This reactivation of the BioCide formula can provide a continuous microbial killing effect. This effect will vary depending on the surface, temperature, and how often the surface is handled.

Using BioCide 100 on medium-to-low usage touch areas such as buttons, coin-slots, and handles, may have a persistent effect for two to four weeks after application. Non-traffic areas have demonstrated signs of an active and continuous killing effect for longer in high humidity structures.

### FEATURES & BENEFITS

- EPA Registered
- Ready to Use - No Dilution Needed
- Kills 99.9% of Mold, Mildew & Fungi
- Kills 99.9% of Bacteria and Viruses
- Meets OSHA Blood-borne Pathogen Standard for HIV, HBV & HCV
- Cleans & Deodorizes in One Easy Step
- HVAC Certified

### APPLICATION

- Residential & Commercial Buildings
- Homes
- Vehicles
- Hospitals
- Nursing Homes
- Restaurants
- Boats
- Office Buildings
- Apartment Complexes
- Churches
- Airports
- Resorts
- Condominiums
- Auditoriums
- Daycares
- And More

**BioCide 100 Gallon**  
Model #: BET 850076005023
