

Where Cards Become Tickets!

Next-generation self-service kiosk redeems in-game collectible cards and colored chips — *faster and smarter*.
Made for all game rooms to cut labor and curb losses.

Engineered for Redemption Efficiency

- Sleek design with integrated display and professional black accents.
- Rugged construction with an all-steel internal framework.
- LED trim on façade features color-changing effects.
- Supports barcoded and RFID cards from Andamiro and other amusement machine manufacturers.
- Configurable for custom product types with reward tiers: Normal, Special and Super Bonus.
- Recognizes completed bonus sets and issues ticket value or points accordingly.
- Compatible with industry-standard swipe card systems.
- USB and email-based bookkeeping exports.
- Software and product content updates supported via USB and internet connection.
- Dual-screen layout with a 27" touchscreen and 23.8" video monitor provides intuitive user experience.
- Video-capable top display enables idle screen branding, promotional loops and instructional content.
- Optional dual ticket dispenser support enables operation in paper ticket venues.
